Brain Injury Rehabilitation Centre

This service is suitable for people who require specialist inpatient rehabilitation to address their ongoing cognitive, communication, physical or other diminished functions due to injury or disease of nervous system.

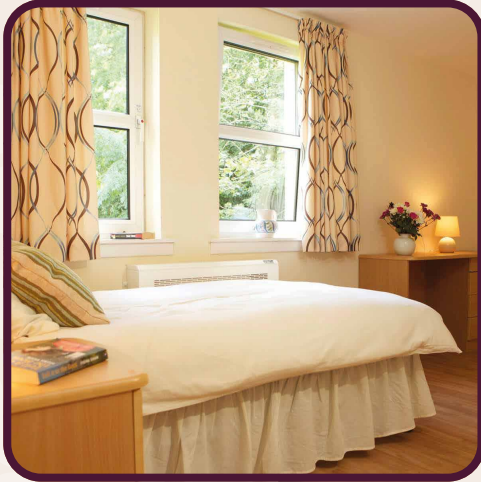

Our team of highly skilled rehab professionals work closely together to ensure that every team member is working towards the same patient-centred goals and that all therapies are focused on the areas that will enable patients to achieve those relevant, clearly defined and agreed goals.

Our experienced multi-disciplinary team includes Nurses, Physiotherapists, Occupational Therapists, Speech and Language Therapists, Psychologists and a Consultants in Neurology, Rehabilitation Medicine, and Psychiatry. Our multi-disciplinary teams are experienced in managing associated needs, such as specialist spasticity management, tracheostomy care, PEG feeds and skin integrity problems.

Take a look around...

We most commonly assess and admit patients who are in the very early stages of recovery from a brain injury from a NHS hospital. We also assess and treat people who have been living with a brain injury for some time, but due to a change in their situation, would benefit from some treatment or require a period of respite.

We cooperate closely with expert from other health institutions and primary care health and social teams.

Neurological Care Centre

Our slow-stream service is for individuals who need more time to practise new skills before moving back home or into the community. They may or may not have undertaken some specialist rehabilitation first.

Our complex disability service is for individuals with complex problems associated with their condition and who can no longer be looked after easily at home.

Murdostoun Brain Injury Rehabilitation Centre is inspected and regulated by both Care Inspectorate and Healthcare Improvement Scotland.

Headway Approved

We are extremely proud to be accredited as an approved provider of specialist Brain Injury care by the Headway Brain Injury Association.

We're here, lets talk.

We're here to talk to you about any care needs you may require. We have a dedicated team ready to assist you with whatever you need. Should you wish to refer someone to our care or arrange a visit please contact our referrals team.
