

# Frenchay Brain Injury Rehabilitation Centre

## Neurological Rehabilitation Service

 Briggs Road, Frenchay,  
Bristol, BS16 2UU

 0117 956 2697

Conditions we support, but are not limited to:

- Acquired Brain Injury
- Anoxic Brain Injury
- Brain Tumour
- Complex Stroke
- Traumatic Brain Injury
- Inflammatory and infective conditions
- Subarachnoid Haemorrhage

We specialise in the treatment of patients with complex physical and cognitive impairments, challenging behaviours and neuropsychiatric disorders resulting from a brain injury. We offer comprehensive assessment, rehabilitation and therapy. Some patients at have been detained under the Mental Health Act 1983 (amended 2007) or are here under a Deprivation of Liberty Safeguards (DoLS) order.

There are two units on our Frenchay site: Frenchay BIRU South and Frenchay BIRU North. Our Consultant-led Inter-Disciplinary Team work across both units and work seamlessly together to ensure that every team member is working towards the same practical, realistic goals and that all therapies are focused on the areas that will enable patients to achieve those clearly defined and agreed goals.

We are experienced at managing people with PEGS and patients in low states of arousal who require a SMART (Sensory Modality Assessment and Rehabilitation Technique) assessment.

### **Level 1 Regional Specialist Rehabilitation (Frenchay BIRU South)**

Our regional service is for individuals with complex and severe impairments following a brain injury. They require highly specialist intensive care from a highly trained inter-disciplinary team and access to treatment and facilities that are unlikely to be available in their local area.

## Service Overview :

- Capacity up to 52
- Located in Bristol
- Suitable for all genders
- CQC Registered
- On-site Multi-disciplinary team
- 5 Large day rooms
- 2 Gymnasiums
- Therapy kitchen
- Private Gardens
- Hydrotherapy pool

# Take a look around...

Patients are usually in the early stages of recovery from their brain injury and are usually admitted from an acute hospital once they are medically stable.

### Level 2 Specialist Rehabilitation (Frenchay BIRU North)

This service is suitable for individuals who have either completed a period of Level 1 rehabilitation and have ongoing therapy needs, or who have been assessed as having less complex rehabilitation and care requirements.

In either situation, patients have the potential to improve further to either enable a return home or to a community setting with reduced future care needs. We offer two options to reflect the different needs of our patients:

Higher intensity for patients requiring a short period of intensive therapy

Lower intensity for patients who would benefit from therapy spread out over a longer timeframe, for example, due to finding multiple therapy sessions fatiguing

At Frenchay Brain Injury rehabilitation Centre we have aligned and agreed our strategic goals to define what we want our organisation to achieve. This means we have also aligned them with the five domains of the Care Quality Commission (CQC) inspection standards to ensure we provide the very best care possible to all our residents.

### Headway Approved

We are extremely proud to be accredited as an approved provider of specialist Brain Injury care by the Headway Brain Injury Association.

## We're here, lets talk.

We're here to talk to you about any care needs you may require. We have a dedicated team ready to assist you with whatever you need. Should you wish to refer someone to our care or arrange a visit please contact our referrals team.
